SHELLAC

Shellac paints on like polish - base coat, color, top coat - and is cured in a UV light so there is zero dry time. The colors are hypo-allergenic, and "3-Free" - no formaldehyde, toluene. The formula is thin and flexible like polish, so it not only looks natural, it provides strong natural nail protection with a resilient mirror finish that resists dullness and chipping, even during the most rigorous activities and it lasts for 14 days.

As amazing as Shellac is on, removal is just as satisfying!

No soaking, drilling or filing is necessary. Nails are wrapped in individual Shellac Remover Wraps -integrated cotton pads that limit finger and skin exposure to acetone by keeping it pinpointed on just the nail. Ten minutes of time is all that's needed.
